

The internet, as it currently is, should not be tampered with. As of this moment we have an equal and fair internet that does not let ISPs to pick favorites. If Net Neutrality is revoked many parts of the internet could be censored if the ISPs find them unsavory. Independent media could be targeted, stifling the freedom of the press and information. The ISPs could force individuals to pay more money for certain websites, which would cause a public outcry and the current majority party would get an electoral loss in 2018 and 2020. I speak on behalf of everyone I have talked to regarding this issue, if Net Neutrality is taken away we will vote against all Republicans, including Donald Trump. We know how much the ISPs pay each politician. We are educated. We realize that you want to revoke Net Neutrality to stifle informative websites like OpenSecrets which shows us all of your corruption. Uphold Net Neutrality or face the consequences in the next two elections.
